Beechgrove Trees and Hedging is not currently VAT registered, so no VAT needs to be added to these prices. Most trees will be 20-40cm in size. The majority of trees are grown in a 175ml cell using a peat-free growing medium, but some trees are grown in larger cells and some are bare rooted (only available mid-Nov onwards). Numbers of all species are limited so you should order at the earliest possible opportunity as we usually sell out of most species by Christmas. Where a species is no longer available, we will contact you to offer alternative species, but will only substitute species with your agreement.

Tree seed is collected locally where possible, but cropping differs between years, with some years, individual species simply fail to crop. To try and provide the full range of species, we buy in seed from across the UK, so if you require details of seed provenance, simply get in touch.

Purchased plants/tubes etc can be collected by arrangement. Deliveries within Dumfries and Galloway and the Scottish Borders can be arranged either using our own transport or couriers. All other deliveries will be by courier. All deliveries will be charged at a cost based on the size of the consignment and the weight.

Orders can be made in person, over the phone or by email. A delivery period will be agreed and full payment must be made prior to delivery. Because of high demand, if by 1st March, where trees/guards/stakes etc are not collected or a revised delivery period agreed with us, we reserve the right to re-sell such items.

We welcome opportunities to plan ahead, so if you are considering a planting project over a number of years, we can potentially include additional species in our range. Also if you have a larger project (over 10,000 trees) which you are looking to take forward in subsequent seasons, we are happy to discuss how we can help you.

Note – prices for stakes and guards may be subject to increase during the year due to factors outside our control.
